

# Make Recycling Fun!

## with Midland Recycling's Mobile Environmental Education Center

### WHAT

The Mobile Environmental Education Center (MEEC) was designed to educate Nebraska residents about the importance of environmental stewardship. It is the first of its kind in Nebraska and uses state of the art technology including audio and visual displays to convey its messages.

### WHY

Education is a key component to successful environmental stewardship programs. It is the strongest tool to help create the behavioral and social changes necessary to improve and protect our environment.

### WHO

The MEEC is owned and operated by Midland Recycling, in partnership with the NE Department of Environmental Quality.

### HOW DO I BOOK THE MEEC?

The MEEC requires a space measuring 65 ft x 16 ft with enough room to hook/unhook a 53-ft trailer and access to a power source. If you are interested in booking the MEEC at your next event, contact Tonya Bernadt at (402) 476-8502 or [tbernadt@midlandrecycling.net](mailto:tbernadt@midlandrecycling.net).

***Have the MEEC at your next event!!!***
